

DROP OFF AS A SERVICE UI FLOW

i want to submit my app so i go to the market place home and click sumit app

when i click on submit app ,the section opens up ,also provides me a template of the manifest file .
i also have a button to upload my app

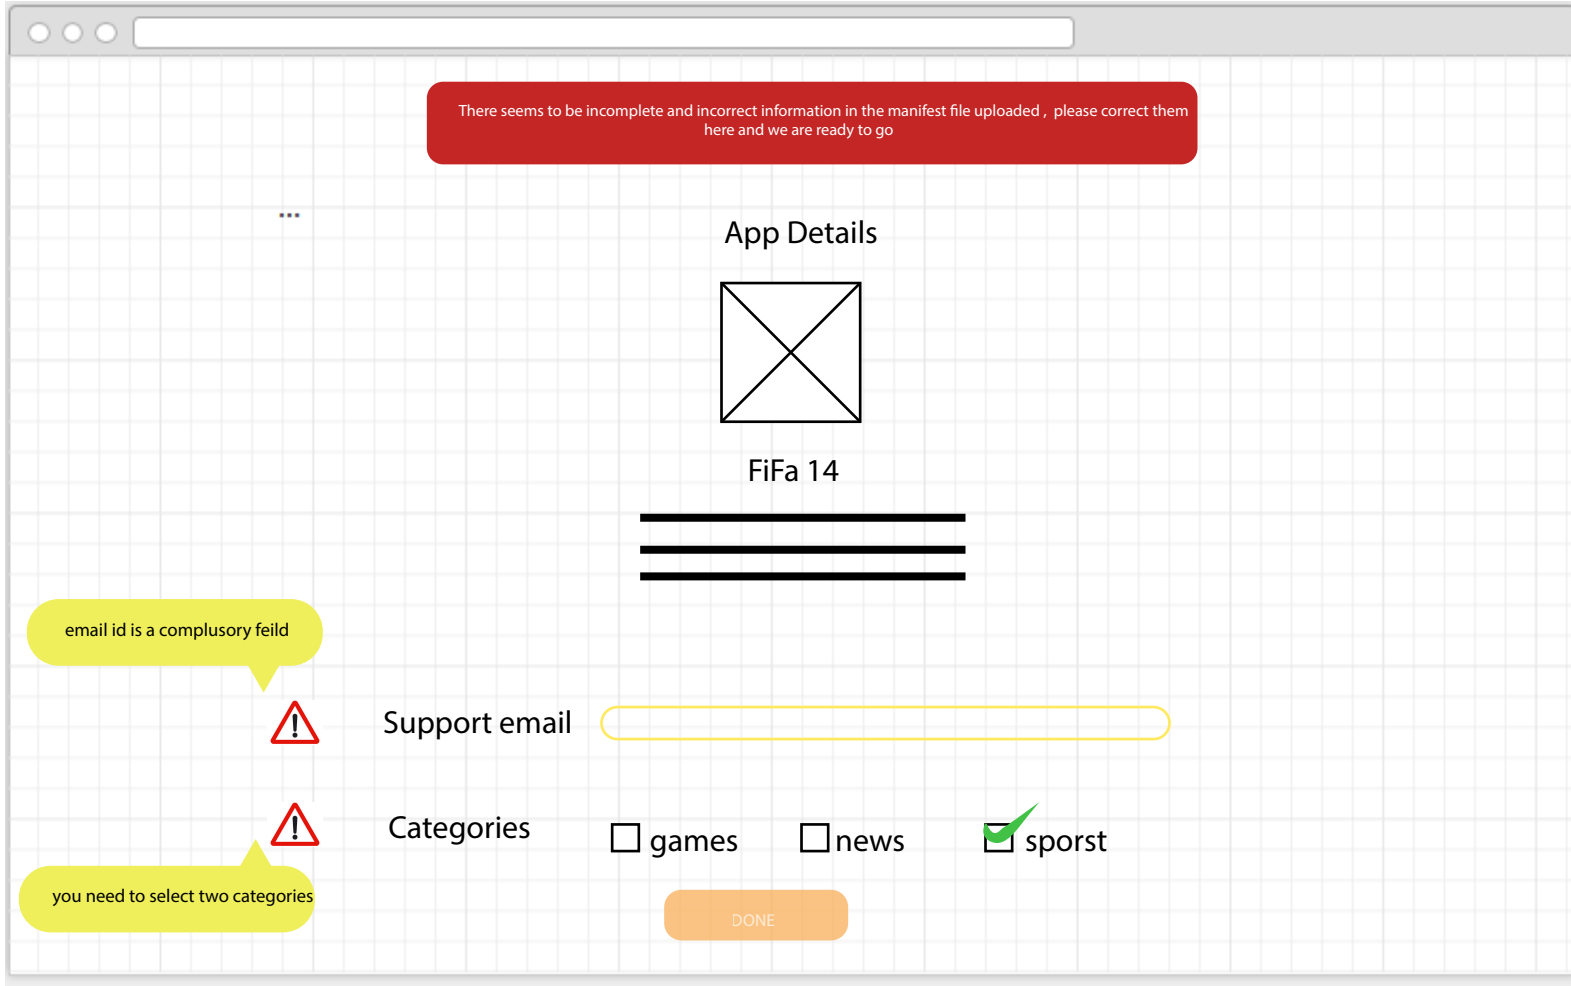

the system then prompts me to download a manifest file before i upload my code i can download it by clicking here
it provides me with a template for the manifest fe

once i upload my code there are 3 things that can happen

1. The manifest i have made is proper with no errors or missing feilds

2. The manifest i made has a few mistakes and some icomplete feilds

3. i forgot to upload the manifest along with my code

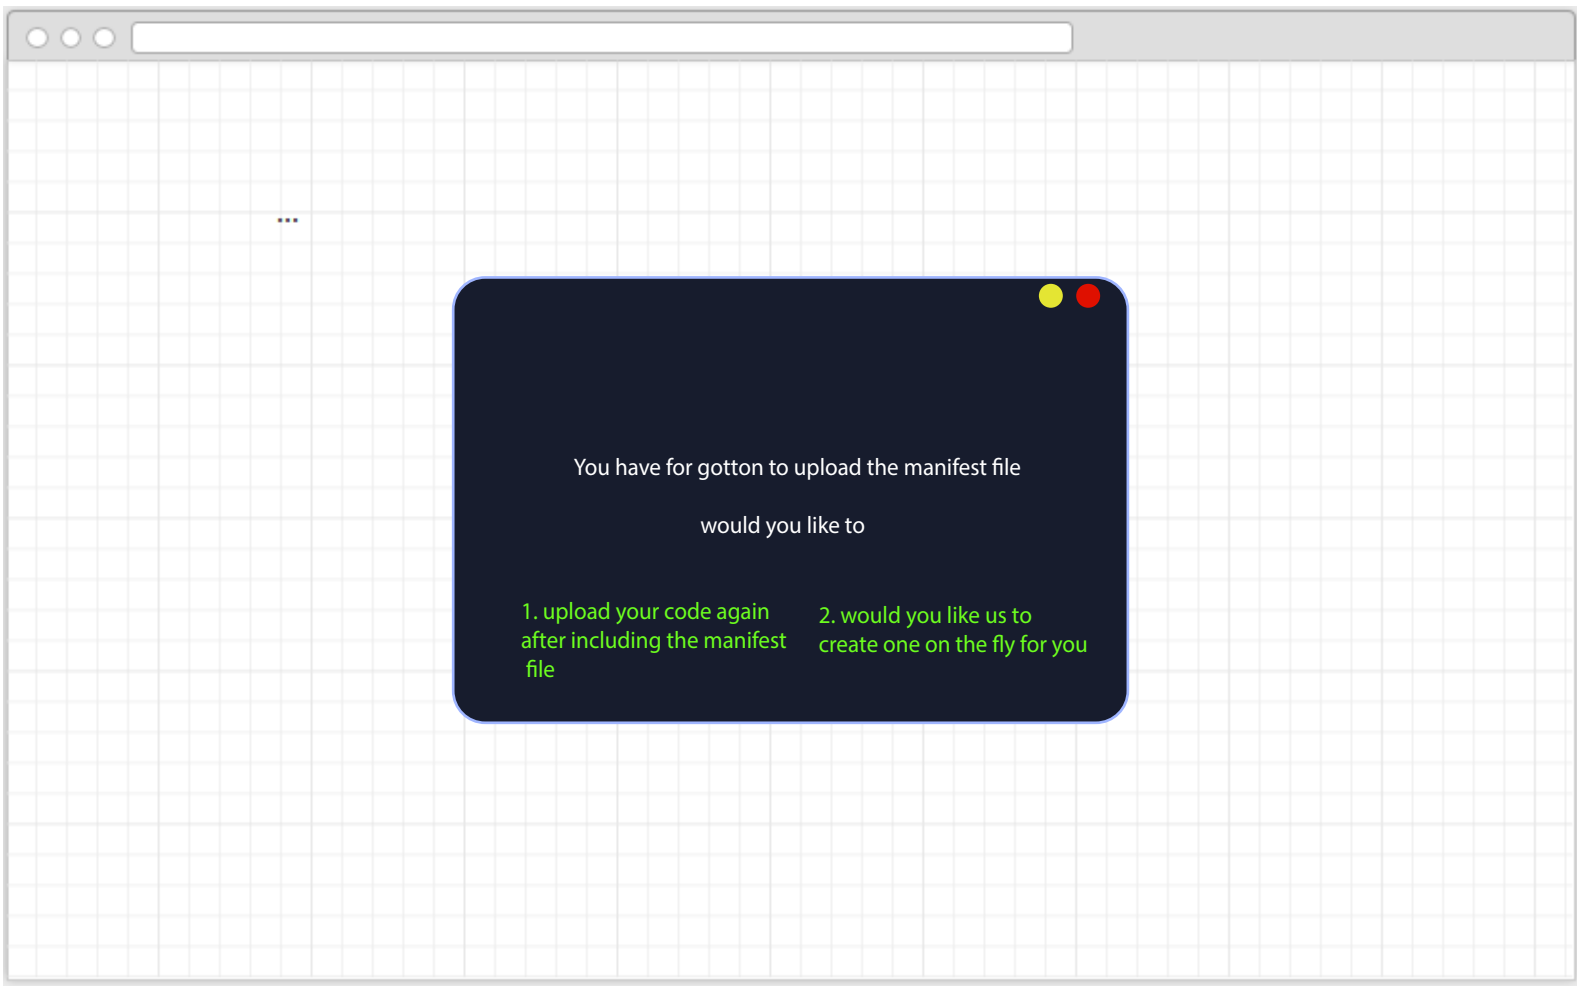

there is a ui form that on the screen it is telling me that i have left a few feilds and there are erros on a few feilds only the feilds with missing and incorrect values are shown , ther others are not shown

the feild i have missed out are outlined in yellow and as i compltete them , they turn to green

the feilds that i have entered wrong are in red and go to yellow when i erase the content and green when i fill them out properly i am also provided with a warning icon that tells me what exactly is wrong and also tells me how i can correct it

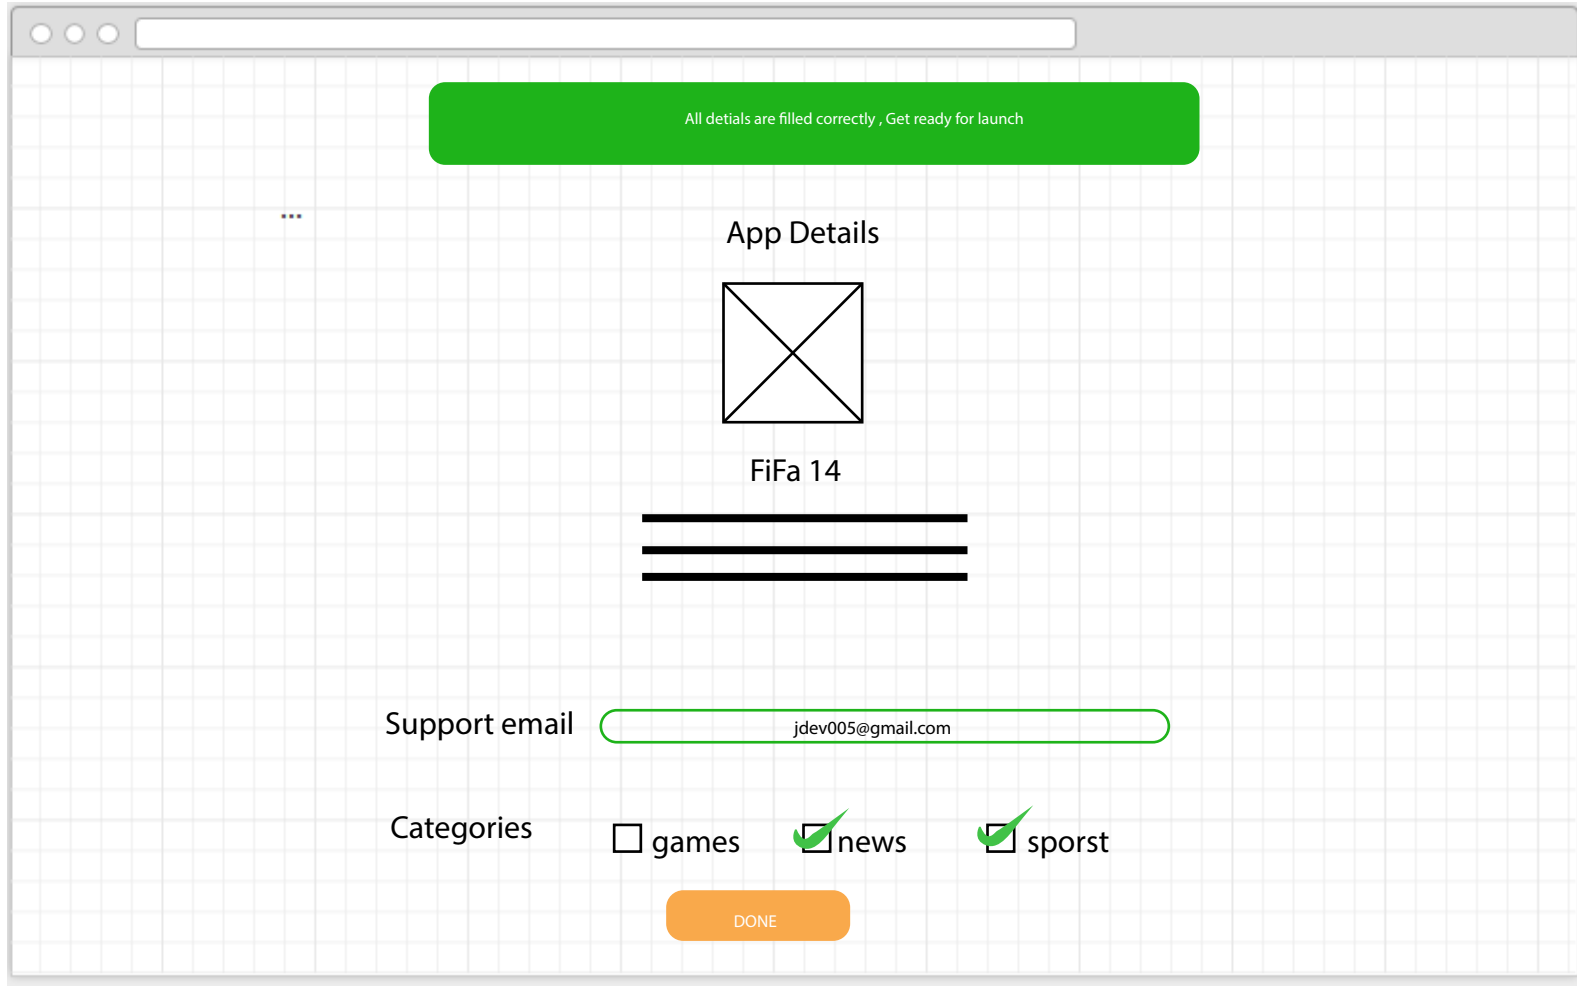

also the done button is disabled till i finish all the field that are red or yellow, i.e the only once all feilds are green can i see the done button enabled

there is a modal that has popped on the screen it is telling me that i have forgotten to fill the manifest and give me an option to either upload the manifest or to create a manifest on the fly using a UI

click option 1 and we go back here

once i enter the correct details

once all the feilds are complete the colors changes from red to green and also the done button is enabled
