

Idea: Devhub is an app publishing service that tags onto Github

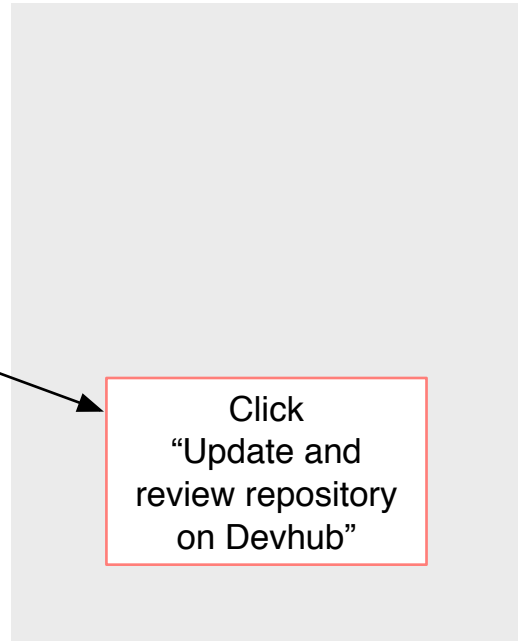

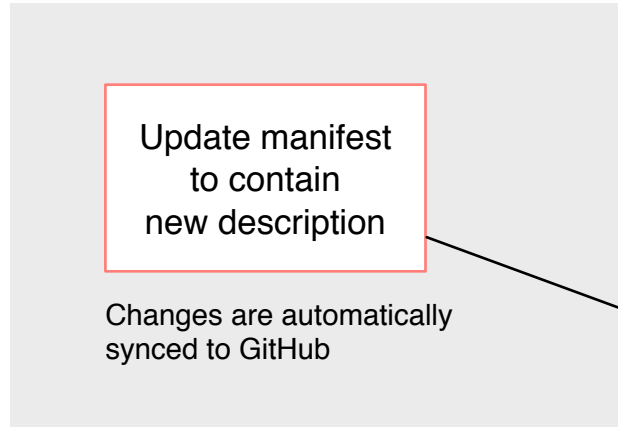

Task 1: I want to get my app into the Marketplace

Task 2: I want to update the description of my app

Local machine

GitHub

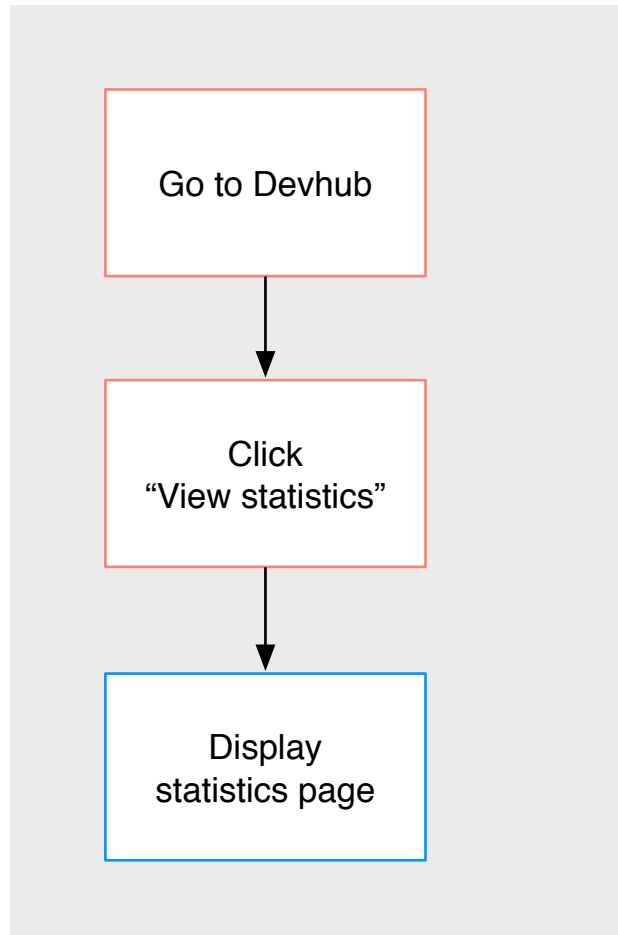

Key

Performed by developer

Task 3: I want to see how many times this app has been installed

Devhub

Key

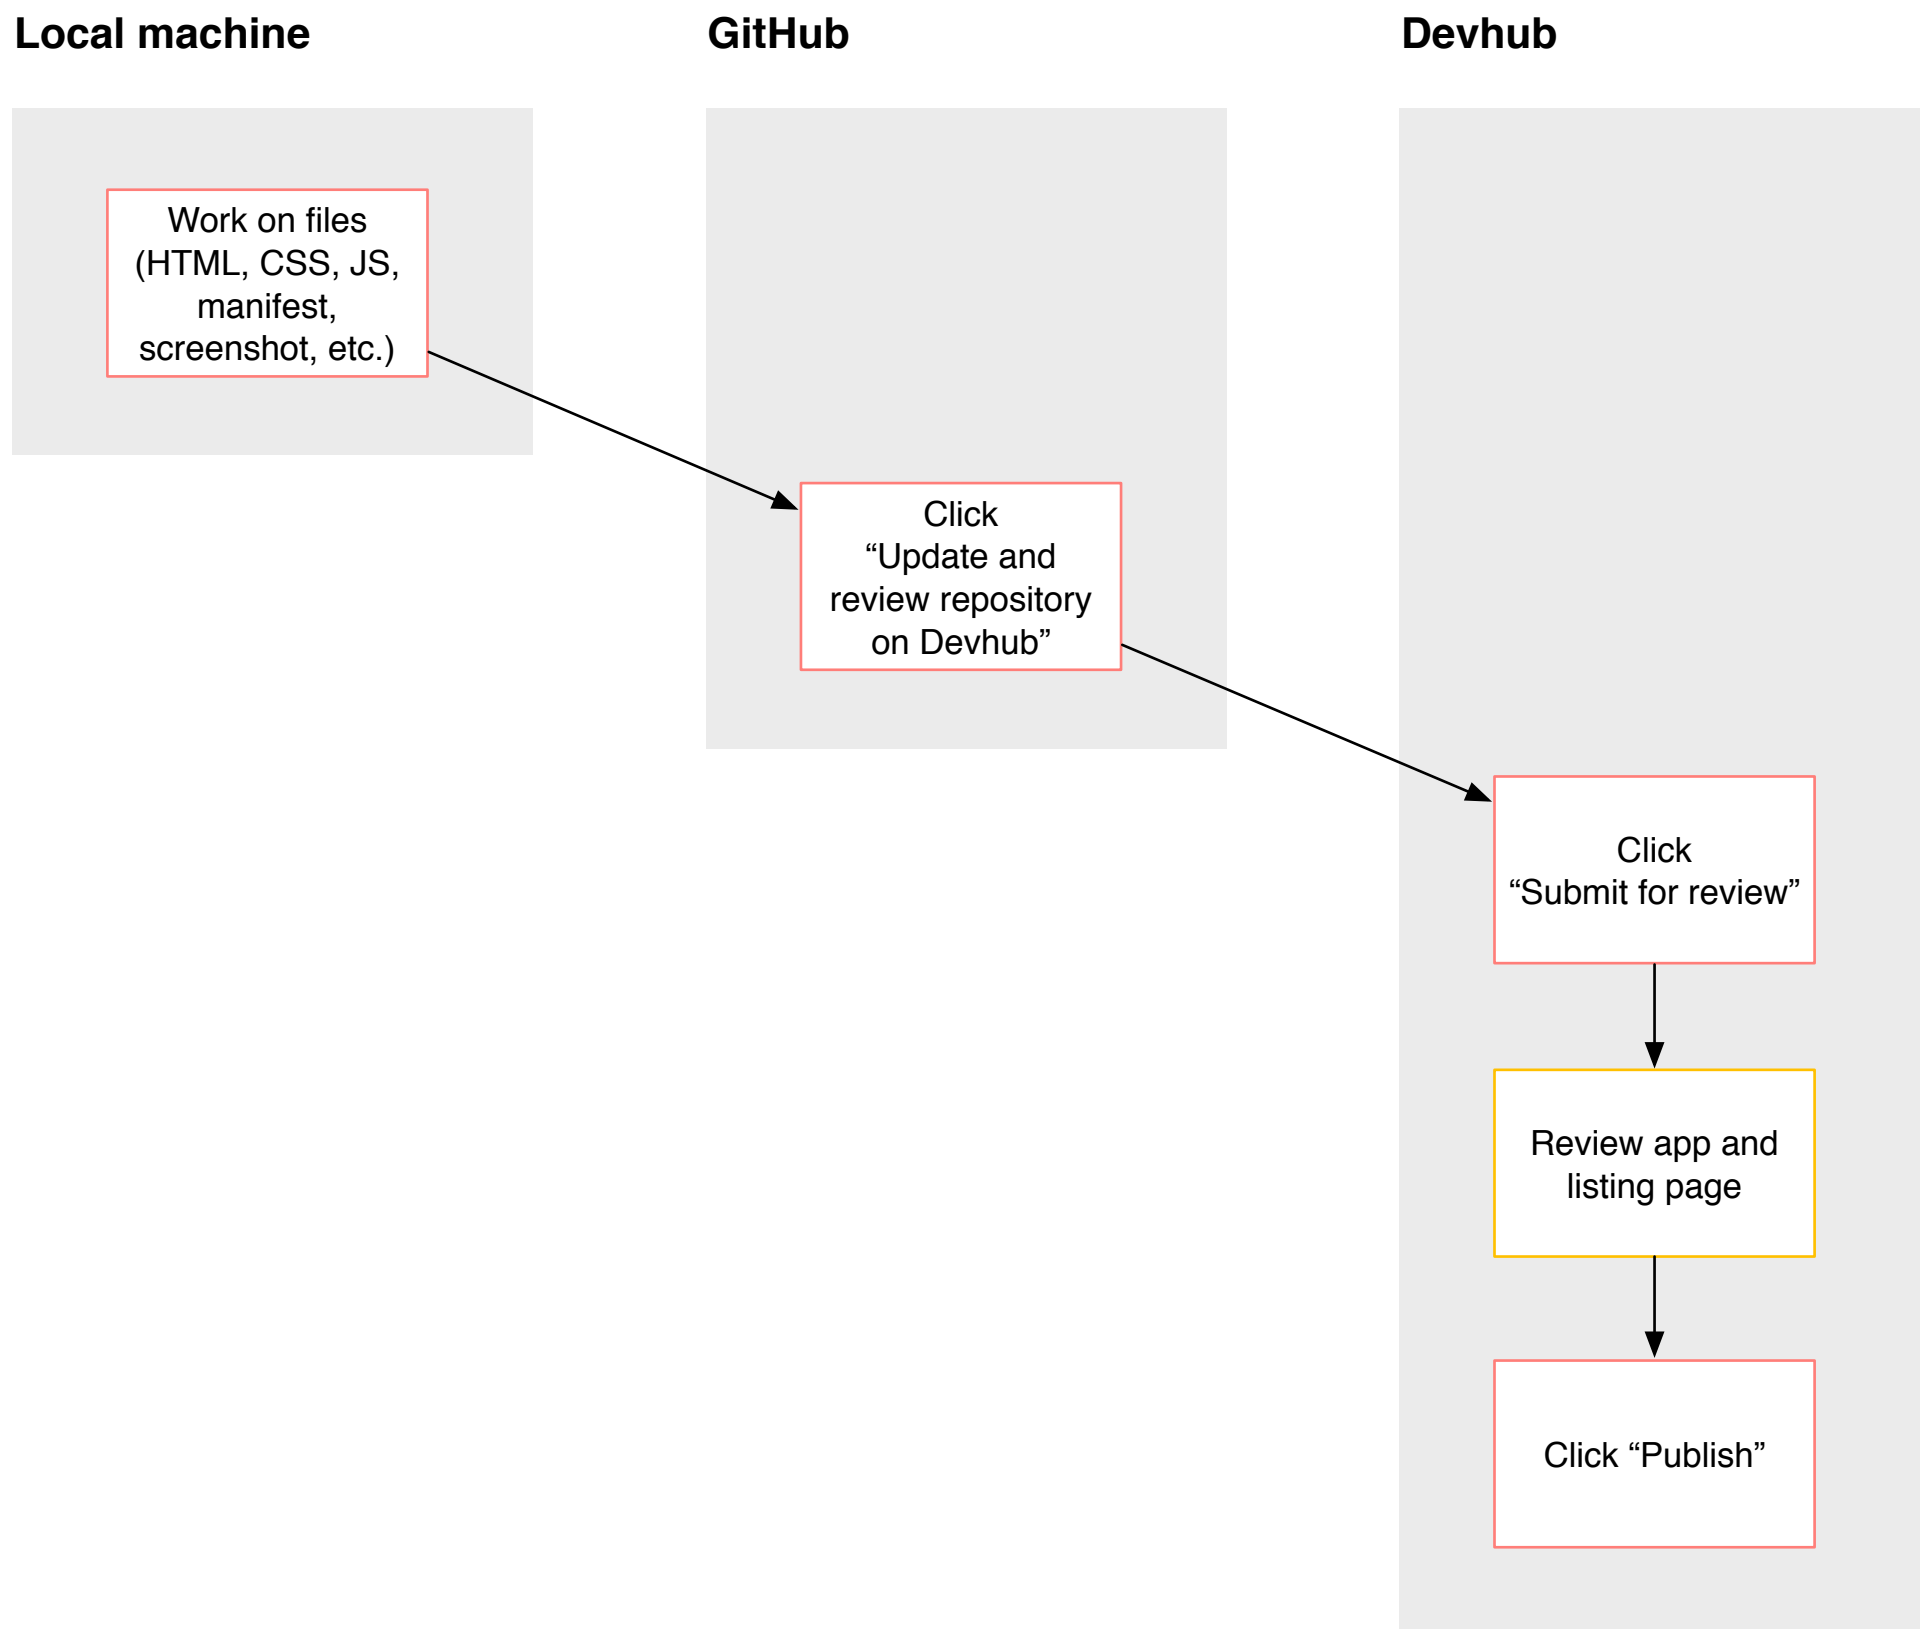

Performed by developer

Performed by system

Task 4: I want to publish a new version of my app

Key

Performed by developer

Performed by reviewers

Optional step
