Idea: App Manager is Devhub

Task 1: I want to get my app into the Marketplace

Open App Manager, add app folder

Validate files

Invalid/didn't pass → Show list of errors & incomplete items

Valid/passed

Edit manifest (using Manifest Viewer)

Set screenshots, availability, price, in-app & category

(Return to Validate files)

Click "Submit for review"

Fill ratings and payment account forms (if relevant)

Review code and listing page

Click "Publish"
